

TVR SOFTWARE
DATA COLLECTION SOFTWARE

The New TVR Software

Purpose-Built for Tribal Vocational Rehabilitation Programs

Key Benefits for Your TVR Program

- Efficiency
- Compliance
- Tribal-Focused

Simplified Case Management

- Easily track participants, eligibility, IPEs, and case notes
- Monitor services, referrals, expenses, and outcomes
- Designed to align with TVR program processes and requirements

Save Time & Increase Efficiency

- Search and retrieve case files, plans, and service history in seconds
- Filter cases by status (program entry, IPE signed, closure pending) for efficient caseload management

Secure & Confidential

- Built to protect sensitive client data
- Role-based access control for staff and leadership
- Meets federal and grant data privacy standards

Remote Access & Collaboration

- Access securely from anywhere—ideal for rural or widespread service areas
- Enables teamwork across multiple locations while keeping data safe
- Cloud-based platform with data backups and security

Training & Help Desk Support

Staff Training
Hands-on onboarding designed for Tribal VR teams or individuals

Help Desk Online and live ongoing support when you need it

Software Updates
Continuous improvements based on your feedback

TVR Software Security Overview

Protecting Tribal VR Data with Confidence and Care

TVR Software is built on AWS and Supabase, inheriting enterprise-grade security trusted by governments and healthcare systems.

Protecting Tribal VR Data with Confidence and Care

We understand the responsibility of managing sensitive participant and grant data—and we've built our platform to ensure it remains secure, private, and compliant every step of the way.

Infrastructure-Backed Compliance

By building on AWS and Supabase, we inherit the security posture of platforms trusted by governments, financial institutions, and healthcare systems worldwide.

Platform-Level Security Features

Built-in protections like role-based access, record-level security, optional multi-factor login, audit tracking, and automatic backups—to keep your data safe and under control.

Security

- ISO 27001, 27017, 27018 – Security, cloud, and PII protection
- SOC 2 Type II – Verified data controls
- HIPAA-Eligible & GDPR-Ready
- AES-256 Encryption – Data secured at rest and in transit

You get proven, modern protection..
